

# How to ESCAPE a TESLA

Rats! You are in a Tesla and it has lost power and you can't get out. Maybe the **12-volt battery died**. Perhaps it has **been in an accident and caught fire** and you have seconds to act! But alas, **without power, the door won't open!** Here is how to unlatch the door and **ESCAPE the TESLA!**

## From the FRONT seat

Ah, you're in luck. In the front it's not as difficult.

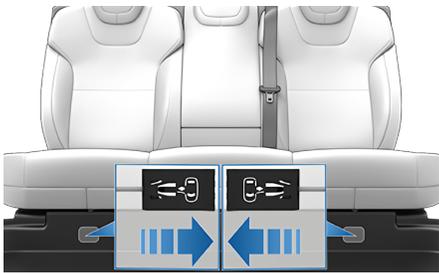

1. **Find the emergency lever** in front of the button cluster on the door (see right).
2. **Pull the lever** to open the door.

## From the BACK seat (TELL YOUR CHILDREN!)

Bad news: it's going to be a little more **tricky to get out**. **There may be NO EMERGENCY RELEASE on some cars**. Honestly, you (or your children) might climb forward and try to exit the front doors if you can. But if you can't do that, then escaping is **different for every model**.

### BACK seat MODEL S

1. **Fold back the edge of the carpet** below the rear seats.
2. **Find the T-handle** on the release cable.
3. **Pull the release cable** away from the door.

### BACK seat MODEL X

1. **Find the speaker grill** at the bottom front corner of the door.
2. **Remove the speaker grill** (we're not sure how, honestly).
3. **Find the release cable** under the speaker grill.
4. **Pull the cable** down and forward toward the front of the car.

## OR EVEN BETTER:

### Don't drive a TESLA! Don't put your CHILDREN in a TESLA!

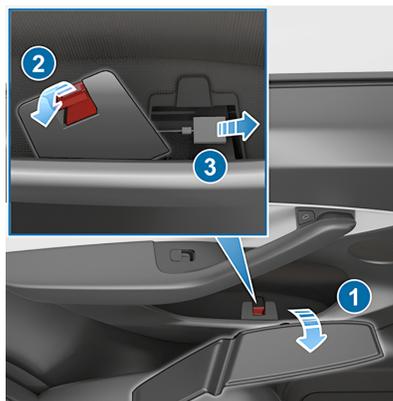

More info and links at [escape-a-tesla.com](http://escape-a-tesla.com). If you have more details or better pictures on any of these cars, please get in touch at [help@escape-a-tesla.com](mailto:help@escape-a-tesla.com).

### BACK seat MODEL 3

1. **Find the small removable panel** at the bottom of the door pocket.
2. **Slide your finger under the panel** in the finger recess and **pull up**, opening the panel.
3. **Find the small cable loop** revealed underneath the panel.
4. **Pull the cable forward** toward the front of the car.

### BACK seat MODEL Y

1. **Remove the mat** from the bottom of the rear door pocket.
2. **Press the red tab\*** to remove the access door.
3. **Pull the release cable** forward toward the front of the car.

\*On some Model Ys you may need a **screwdriver to pry it open** instead.
